ADDRESS CONVERSION APPARATUS, MONITORING APPARATUS, AND COMPUTER-READABLE MEDIUM STORING A PROGRAM THEREOF

Abstract of Disclosure

An address conversion apparatus that connects a first network to a second network. A receiving unit receives a first SNMP trap from a communication apparatus on the first network and a converter changes a predetermined part of the first trap to generate a second SNMP trap. A transmitting unit transmits the second SNMP trap generated by the converter to a monitoring apparatus of the communication apparatus in the second network.
